AT A GLANCE

What is live today

Metric Membership lets your members register their number plates once. When they drive up, the ANPR camera reads the plate, the membership is checked, and the barrier opens on the way in and out. No tickets, fobs or queues.

The live Microsoft Store listing. It is fully branded as Metric, with Vesopa named only as the developer.

Microsoft Store appapps.microsoft.com/detail/9NTLR9S47K4W

Store ID 9NTLR9S47K4W · free · Windows 10 and 11

HOW IT WORKS

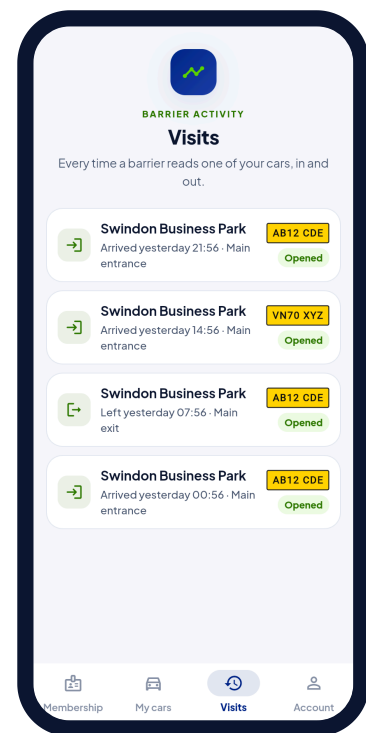

Your car is your pass

Membership card

My cars

Visits

What members can do

- ✓ **Digital membership card** with member number, plan, status and a QR code for staff to scan.
- ✓ **My cars**: add, change or remove registrations up to the plan's limit. Changes reach the barriers automatically.
- ✓ **Visits**: every arrival and departure, by site and gate.
- ✓ **Account**: name, phone and company, the sites covered, and a button to delete the account and every car on it.
- ✓ **One secure sign-in** with Continue with Vesopa. No new password to remember.
- ✓ **Every device**: Windows app from the Microsoft Store, and the web app on any phone or tablet.

YOUR ACCOUNTS

Admin and staff sign-in details

Everything at Metric Membership and in the Vesopa client area uses one secure sign-in: **Continue with Vesopa**, at auth.vesopa.com. It is the same account in every place.

Administrator account

ADMIN

Name	Matt Hammond
Email (username)	m.hammond@metricgroup.co.uk
Access	Owner of the Metric Group organisation in Vesopa, administrator of the Metric Membership app, full access to the staff console, and the Metric Group account in the Vesopa client area.
How to sign in	Continue with Vesopa and enter your email. Then either type the 6-digit code we email to you, or choose Use your password instead and enter the password below.
Password	 Use this or the emailed code. Please change it to your own at auth.vesopa.com after your first sign-in.

Staff and test account

STAFF

Name	Alex Carter
Email (username)	staff@metricgroup.co.uk
Access	A member with sample cars and visits, plus staff console access. It is the account Microsoft uses to test the app, so please keep it.
How to sign in	Continue with Vesopa, enter the email, then on the code screen choose Use your password instead and enter the password below.
Password	 Please change it after your first sign-in.

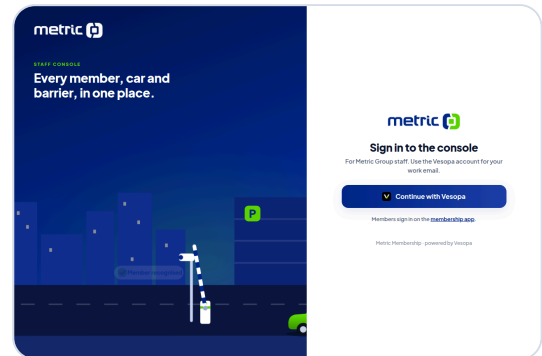

Keeping your accounts safe. We never send passwords in the same email as a username. Please change the staff password once you have signed in, add any more staff by sending us their work email addresses, and turn on a passkey or two-step sign-in at auth.vesopa.com for the administrator account.

GETTING STARTED

Activate your access in five minutes

Staff console

- 1 Open metric.vesopa.com/admin on a computer.
- 2 Click **Continue with Vesopa**.
- 3 Enter m.hammond@metricgroup.co.uk and click **Continue**.
- 4 Type the 6–digit code from the email Vesopa sends you, or choose **Use your password instead** and enter the password on page 4.
- 5 You land on the console overview. Tick **Remember me on this device** to skip the code next time.

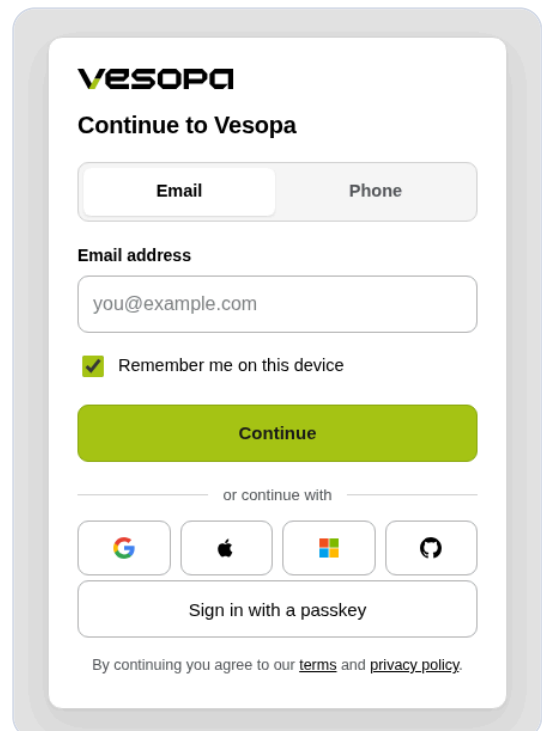

Step 1: the console sign-in page.

Windows app

- 1 Open the [Microsoft Store link](#), or search for **Metric Membership** in the Store.
- 2 Click **Get**, then **Open**.
- 3 Click **Continue with Vesopa**. Your browser opens, you sign in as above, and the app opens signed in.

Phones and tablets

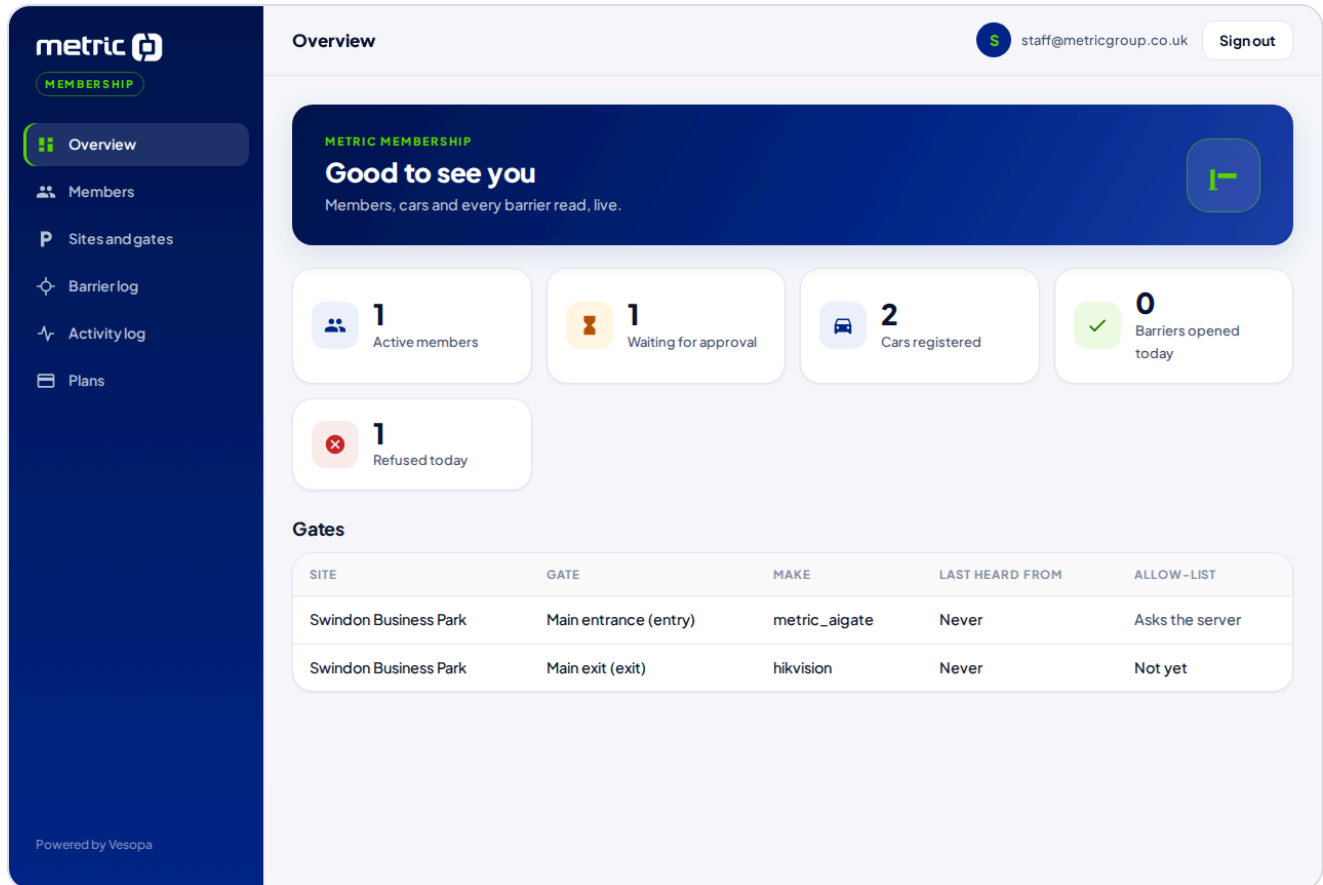

- 1 Open metric.vesopa.com in Safari or Chrome.
- 2 Choose **Add to Home Screen** (iPhone and iPad) or **Install app** (Android) to keep it like an app.

Steps 3 and 4: the Vesopa sign-in. Google, Apple, Microsoft and passkeys also work if they use the same email.

STAFF CONSOLE

Every member, car and barrier

The screenshot shows the 'Overview' page of the Metric Membership staff console. The left sidebar contains navigation links: Overview (selected), Members, Sites and gates, Barrierlog, Activity log, and Plans. The main content area has a top header with the user 'staff@metricgroup.co.uk' and a 'Signout' button. Below this is a 'Good to see you' message. The dashboard features five summary cards: 1 Active members, 1 Waiting for approval, 2 Cars registered, 0 Barriers opened today, and 1 Refused today. At the bottom, a 'Gates' table lists two gates at Swindon Business Park.

SITE	GATE	MAKE	LAST HEARD FROM	ALLOW-LIST
Swindon Business Park	Main entrance (entry)	metric_aigate	Never	Asks the server
Swindon Business Park	Main exit (exit)	hikvision	Never	Not yet

The console overview: active members, approvals waiting, cars registered, barriers opened and refused today, and every gate.

Day to day

- ✓ **Members:** approve new sign-ups. A new member opens no barrier until you approve them.
- ✓ **Sites and gates:** add car parks and entry or exit gates, and set which camera each one uses.
- ✓ **Barrier log:** every plate read, opened or refused, with the reason.
- ✓ **Activity log:** who changed what, and when.
- ✓ **Plans:** membership plans, how many cars each allows, and how long they last.

Your branding

Under **Appearance** you choose the colours of the phone's top and bottom bars and the opening animation. Changes reach every open app automatically.

One item we still need from you: the make and model of your ANPR cameras and barrier controllers, network access to them, and the Mi-Xchange API document. The barrier link is ready for Hikvision, Dahua and webhook-based systems, and we will connect it as soon as we have these.

VESOPA CLIENT AREA

Your project with us, in one place

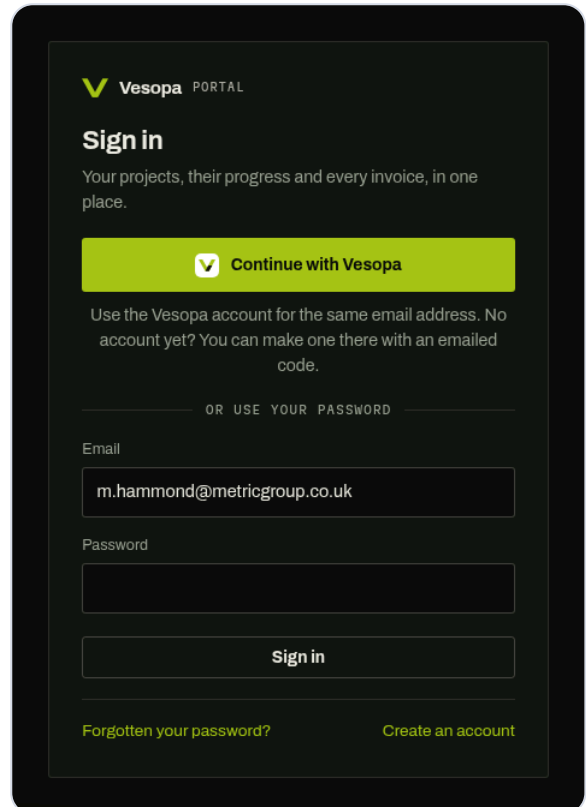

The Vesopa client area is where Metric Group can see the plan for the Metric Membership app, what is done and what is next, any quotes to approve, and every invoice.

How to sign in

- 1 Go to vesopasoftware.com/portal.
- 2 Click **Continue with Vesopa**.
- 3 Sign in with **m.hammond@metricgroup.co.uk** and the emailed code, exactly as for the console. If you are already signed in to the console, you go straight in.
- 4 You arrive in the **Metric Group** account, with the **Metric Membership app** project already set up.

What you will find

- ✓ **Waiting on you:** anything we need from Metric, such as the camera details.
- ✓ **The plan:** milestones for the barrier link and anything we agree next.
- ✓ **Quotes:** accept or decline in one click.
- ✓ **Invoices** and billing details.
- ✓ **Team:** invite colleagues to see the project with you.

The client area sign-in, using the same Vesopa account.

YOUR DECISION

How would you like to continue?

The app is yours to keep in whichever way suits Metric best. Please tell us which of these you prefer by replying to our email.

OPTION A - RECOMMENDED**Continue with Vesopa**

We keep running, hosting, updating and supporting Metric Membership, connect your barriers, and grow it with you. You keep full control as the administrator.

- Hosting, security updates, backups and monitoring included
- Store listing kept up to date, with new releases tested for you
- One point of contact for the app, your website and your other digital work

OPTION B**Hand everything over to Metric**

We move the app onto Metric's own accounts and website, and help your team or supplier take it on.

- Transfer the Store listing to Metric's own Microsoft Partner Center account
- Move the app to your own address, for example members.metricgroup.co.uk
- Full export of members, cars, visits and settings, plus the source code and documentation
- A handover session with your team, and support for an agreed period

OPTION C**Pause or remove the listing**

If the membership app is not needed now, we remove the Store listing, give you an export of any data, and securely delete the rest. We can bring it back later if you change your mind.

WORKING TOGETHER

Everything digital, through one partner

Vesopa Software Ltd can look after Metric's whole digital estate, with a clear structure and plan agreed with you.

Websites

Design, build and hosting for metricgroup.co.uk and site-specific pages, fast and accessible.

SEO

Technical SEO, local search for every car park, content and monthly reporting.

ASO

App Store Optimisation: listings, keywords, screenshots and reviews on every store.

iPhone and Android

Native apps on the App Store and Google Play, from the same code as today's app.

iPad and tablets

Tablet layouts for gatehouse staff and reception desks.

Policies and compliance

Privacy, cookies, terms and accessibility statements, kept in line with UK GDPR.

Hosting and email

UK-managed hosting, domains and monitoring on Vesopa Cloud.

Structure and plan

A digital roadmap with milestones, owners and budgets, tracked in the client area.

Support

A named contact, agreed response times and regular reviews.

A suggested plan

WEEKS 1-2

Connect the barriers and go live

Camera details, test at one site, train staff on the console.

MONTH 1

Review and roadmap

Audit of the website, search and policies, then a written plan with costs for you to approve in the client area.

MONTHS 2-3

Phones, tablets and the website

iPhone, iPad and Android apps; website and SEO improvements; store listings optimised.

ONGOING

Grow and look after

Monthly reporting, updates, security and new features as Metric grows.

NEXT STEPS

We would love your feedback

Please try the app and the console, then reply to our email with your thoughts and your choice of option A, B or C.

In your reply, please let us know

- 1 Whether you would like to **continue with Vesopa**, **take everything over**, or **remove the listing**.
- 2 Your **review** of the app and the console: what works and what you would change.
- 3 The **ANPR camera and barrier details**, network access and the Mi-Xchange API document.
- 4 The **work email addresses** of any staff who need console access.
- 5 Anything else you would like help with: website, SEO, ASO, phone and tablet apps, or policies.
