

2 Sale screen — three directions, all matched to Payment 1a

All live: switch categories, tap products to add, tap bill lines to select. Per-item offers show on every line — struck-through gross, net price, and a chip naming the deal. Same brand language as 1a: black ground, #0e1113 panels, Leafy Canopy as the one accent.

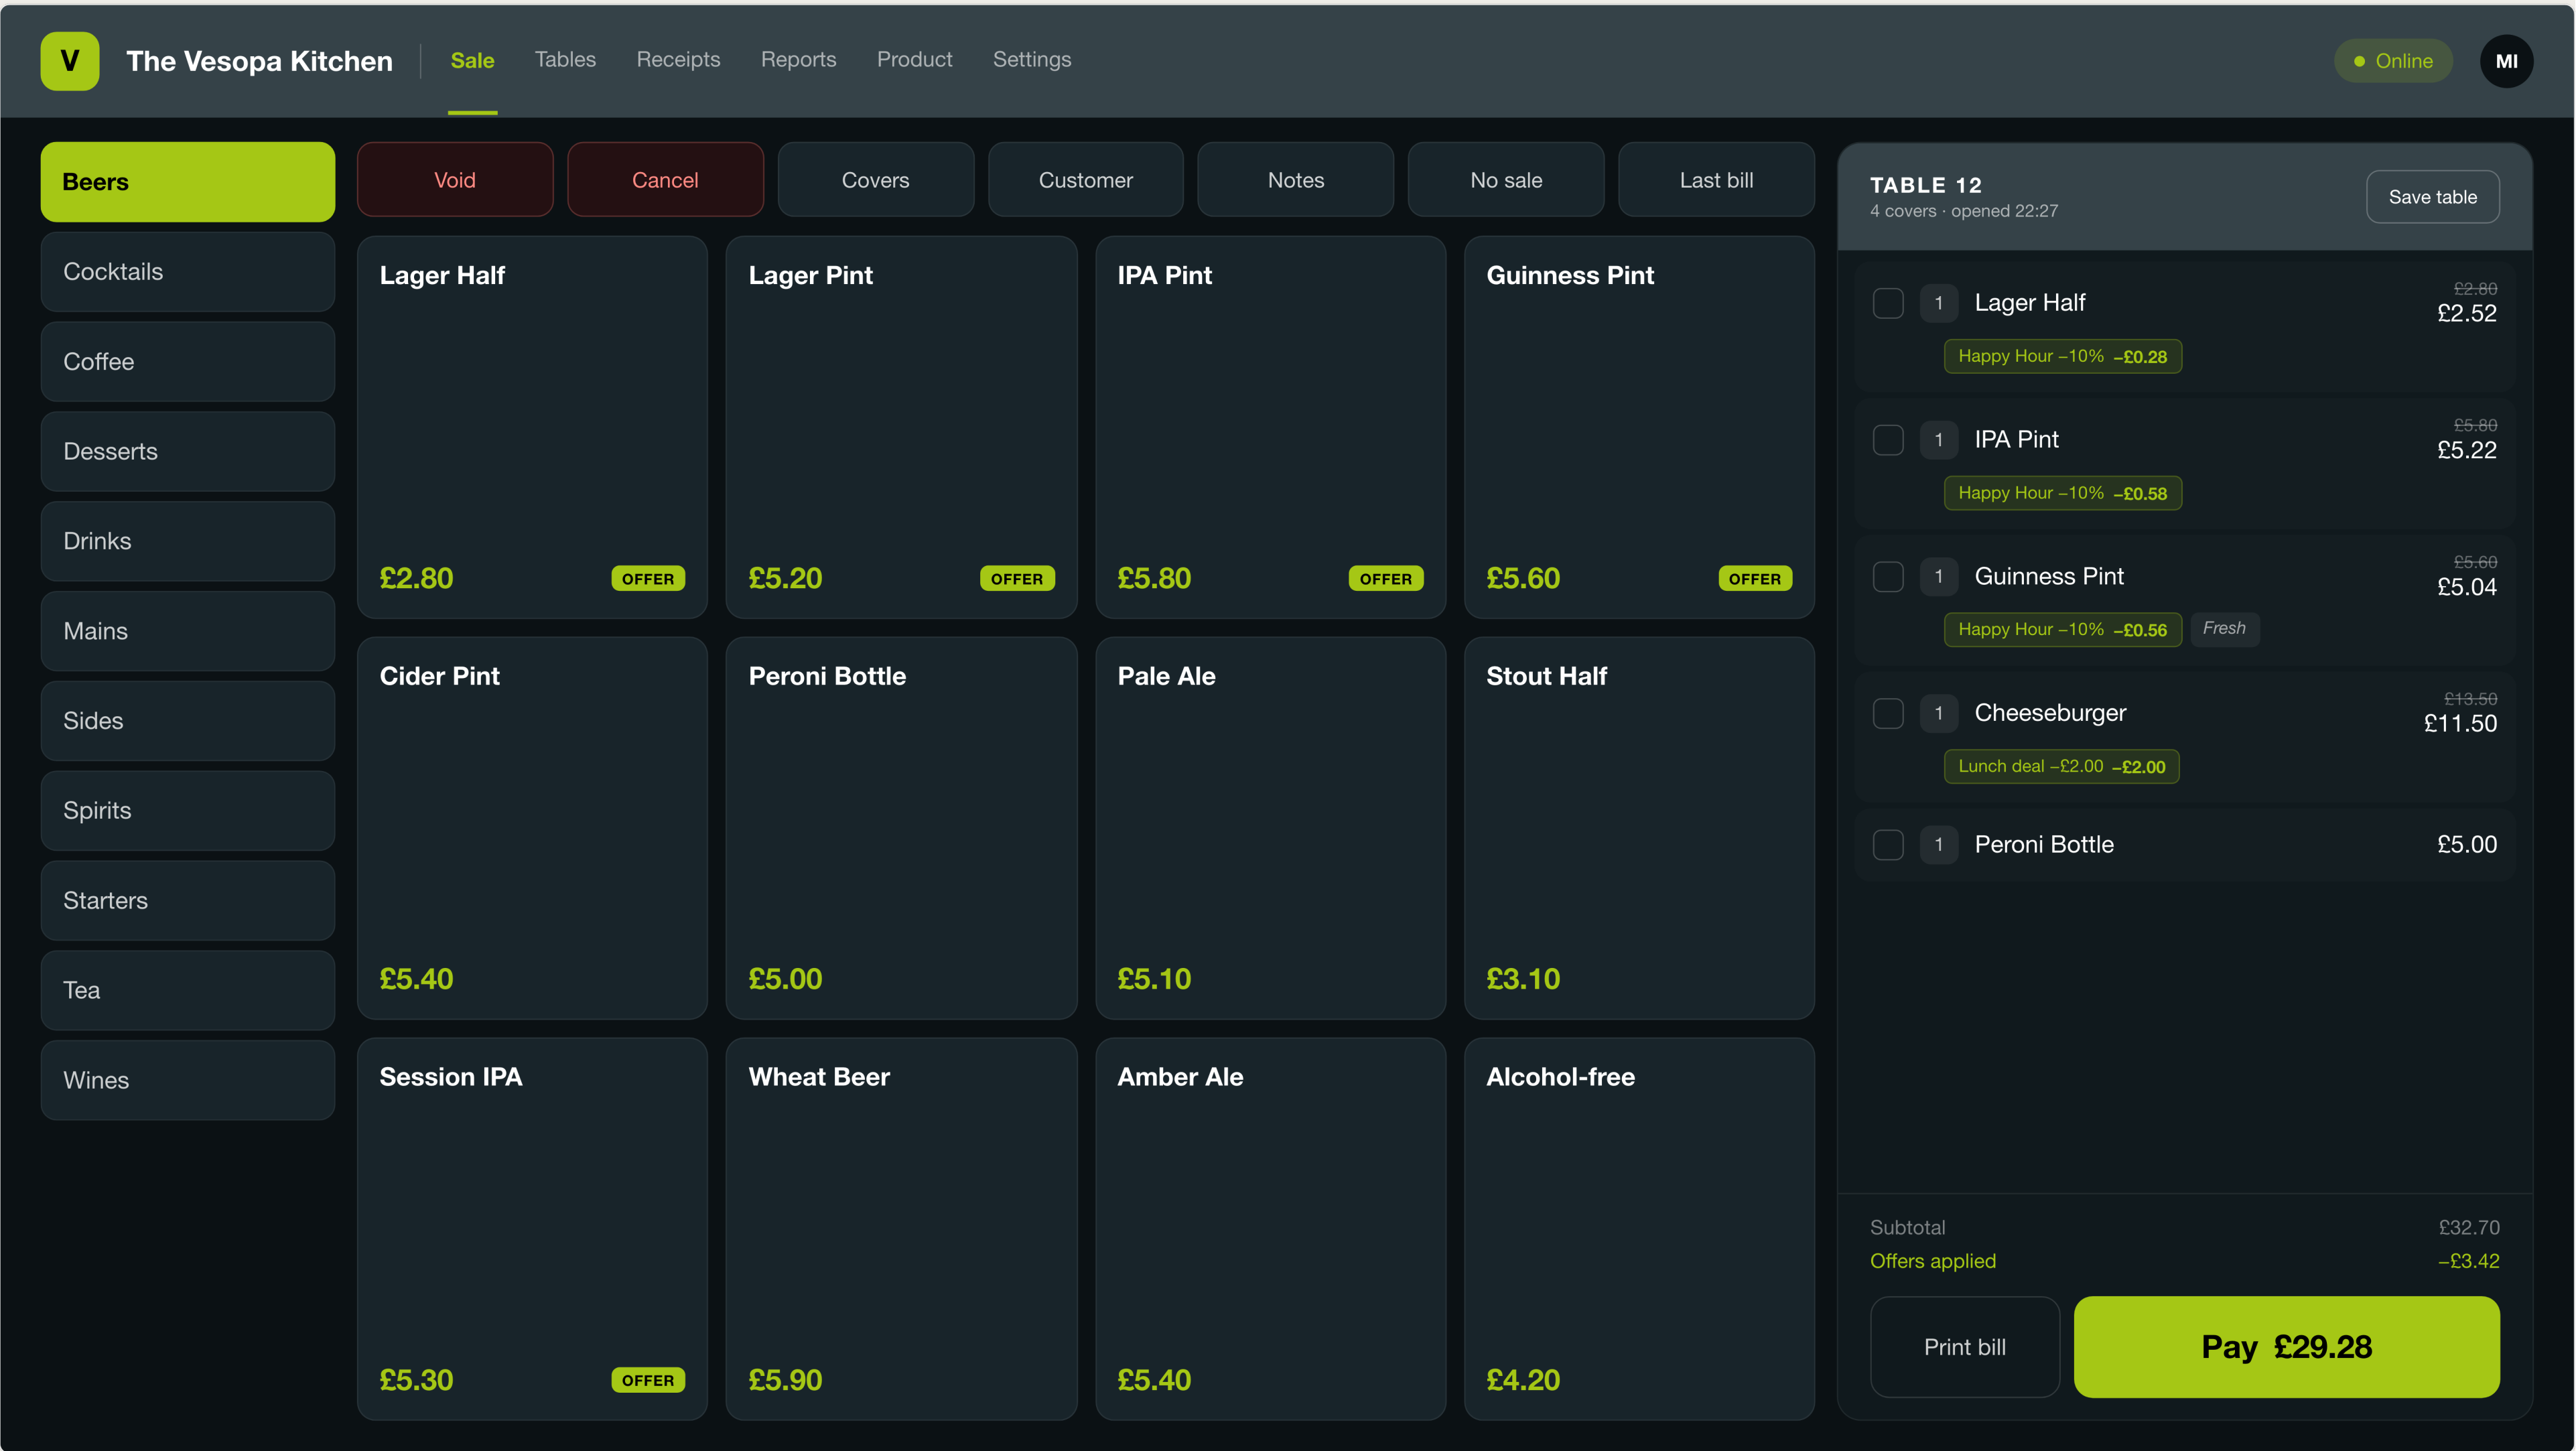

2a Ledger — 1a's direct sibling: bill left, grid centre, category rail right, action bar below

2b Counter — category tabs on top, grid dominates, bill docked right with Pay built in; no bottom bar

2c Slate — Inkblot surfaces, category column + grid left, tall receipt-style bill right, actions above the grid

Pick one — 2a keeps the familiar bottom action bar, 2b gives products maximum space with actions folded into the bill, 2c is a lighter slate look with actions above the grid. Mixes welcome.
